

For all that cancer takes, give it a go.

There are 1012 daffodils

daffodilday.com.au

Daffodils guessing game

1. Your host has estimated the number of daffodils and has folded their answer back so no one can see (no peaking!)
2. Players pay an entry-fee (approx. \$5) to guess how many daffodils are on the poster.
3. Once all players have made their guess, your host will reveal the number – the closest guess wins!
4. The winner receives half the money collected for the game and your host donates the other half to Cancer Council to fund vital cancer research.
